

# Digital Credentials Consortium Learner Credential Wallet

DCC Community Meeting, July 7, 2022

Brandon Muramatsu, MIT  
Dmitri Zagidulin, MIT

# Guiding Principles | Values

**Learners** - Commitment to learner agency and participation

- Learners retain primary control over their credentials

**Issuers** - Commitment to issuer control of the design of the credential

- Issuers control to whom they issue credentials, the particular achievement that the credential represents, and which credential options are available to the learner

**Trust** - Commitment to open processes, open standards, and open source software

- Credentials can be verified without consulting original issuer

# How does DCC do its work?

- Implements open standards, develops open source reference libraries and software, provides core infrastructure services
  - **W3C Verifiable Credentials for Education** (W3C VC-EDU)
  - **Invited expert** to IMS Global on Comprehensive Learner Record and **Open Badges v3 specifications**
  - Connected to international efforts (e.g., EU, EBSI, Europass)
  - Software & Libraries: <https://github.com/digitalcredentials>
- **DCC members build and launch pilots**
  - Supported through Technical Working Group (DCC TWG)

# About the Open Source Wallet Project

- Key component of digital credential ecosystem
  - Prioritizes learner agency
  - Prevents lock-in
  - Establishes reference implementation
- Wallet specification released (May 2021)
- Open-source code hosted on Github (Dec 2021)
- iOS and Android mobile apps published (Feb 2022)
- Deployment pilots with U.S. institutions (March 2022)
  - Georgia Tech, College Unbound, San Jose City College
- Funded by Department of Education, Walmart

# Learner Credential Wallet Specification

Published May 2020

<https://digitalcredentials.mit.edu/docs/Learner-Credential-Wallet-Specification-May-2021.pdf>

- Implements W3C Verifiable Credentials Data Model
- Informed by LER Wrapper and Wallet Specification for functional requirements
- Builds upon Universal Wallet 2020 Interoperability Specification
- Thanks to VC-EDU for input!

Defined the **Minimum Viable Product** implemented as the Learner Credential Wallet at <https://lcw.app>

# Learner Credential Wallet

A place to store your digital learner credentials

Learner Credential Wallet is an open source mobile wallet developed by the [Digital Credentials Consortium](#), a network of leading international universities designing an open infrastructure for academic credentials.

Copyright 2022, Massachusetts Institute of Technology

[Digital Credentials Consortium](#) • [MIT Open Learning](#)

[Terms of Service](#) • [Privacy Policy](#) • [Accessibility](#)

# Current Features in Learner Credential Wallet

- iOS and Android cross platform
- Wallet is entirely stored on the mobile device: no user account
- Add VC-based credentials from a:
  - deep link from a **registered issuer**
  - **QR code**, either fully contained or deep link to a registered issuer
- Supports **diploma-like** or **program certificate-like** credentials using DCC context; **Open Badges v3-draft** context
- Preview credential as human readable display (or JSON)
- Share credential using mobile OS share sheets (JSON VP, can be multiple VCs)
- Backup and Restore wallet (unencrypted)
- Delete Credential
- Tech details: Supports VC-API; did:key, did:web; OIDC & challenge for authentication

# LCW Status

- LCW is in active development!
- LCW in use
  - Add Georgia Tech Canvas course (demo today)
  - Add (and issue) College Unbound Bachelor's Degree
  - Add JFF Plugfest #1 Badge (demo today)
  - Add VC from QR code (demo today)
  - DiBiHo Project
- Forthcoming LCW enhancements (July 2022)
  - Granular verification status (preview)
  - Share a public link from LCW
  - Support for OS biometric features, auto-lock wallet
  - Additional display support, context support
- Forthcoming Issuer enhancements: revocation, registry

# LCW Development

- Maintainer: Dmitri Zagidulin / MIT
  - Contributions from Atomic Jolt, Kayode Ezike, Dirk Uys
- 
- TUM contributions starting
  - McMaster contributions soon
  - Discussions with University of Toronto

# Install & Setup Learner Credential Wallet

## Learner Credential Wallet

A place to store all your credentials. They stay on your device until you decide to share them.

Start Setup

### Password

Setup a password to secure your wallet. You will not be able to recover a lost password.

Password

Confirm Password

### Creating Wallet

This will only take a moment.

### Wallet Initialization:

- Subject DID created on wallet initialization
- Password unlocks LCW
- Password used for encrypted backups (coming soon!)
- Biometric support (coming soon!)

Take Me To My Wallet

# Walkthrough #1

JFF Plugfest 1 Badge (Open Badges v3 Draft Specification)  
Email -> Deep Link -> Receive Badge

Note: June 2022 demo uses developer build, public release coming soon

# What are the Jobs For the Future (JFF) Plugfests?

- 3 events: June 2022, likely November 2022, and a 3rd TBD
- Goal: “Learners move their credentials across multiple wallets and platforms, as needed”
- Supported by VC-EDU

JFF Plugfest #1 Wallet must:

- Display: Open Badges v3 (draft, Verifiable Credentials-based)
- Display: Badge image
- Display: Issuer name, achievement name, achievement description, achievement criteria
- Optional: Issuer logo & other Open Badges v3 terms
- Stretch: Badge verification

*Standards and specifications are great, but what can learners do today with digital credentials?*

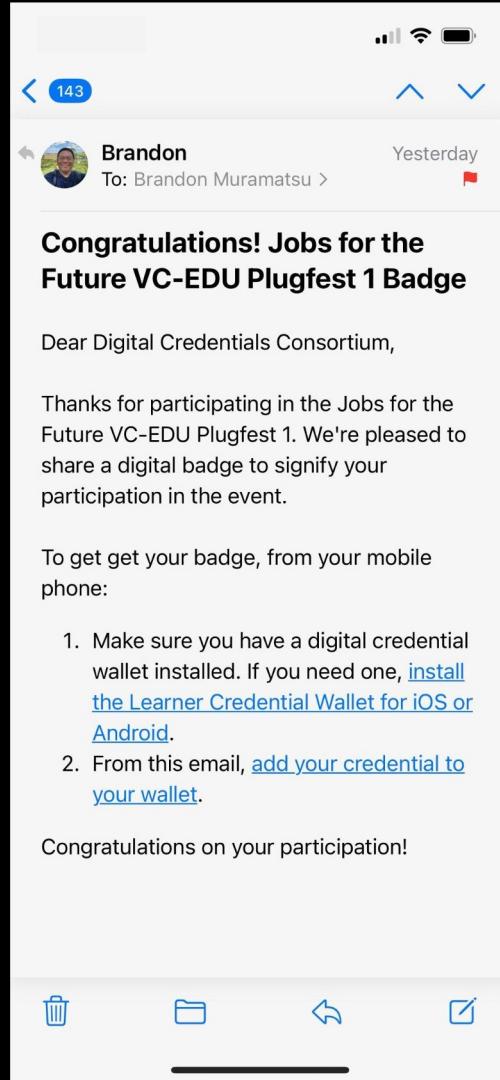

## Workflow:

- Receive email
- Is a wallet installed?

*How? Link takes user to <https://lcw.app> where they can select OS and install wallet*

- Add credential

*How? LCW had registered dcc:// with OS and responds to hyperlinks starting with dcc:// that triggers LCW to receive the credential; if multiple wallets installed iOS (randomly) chooses which app to use and Android shows a picker*

**Description**

College Unbound's Organizational Leadership and Change Bachelor's Degree program provides students with a grounded understanding of the leadership and change skills necessary to make a positive difference in their workplaces and communities. Through theoretical and practical exploration, this degree program prepares students to apply leadership and change skills in evolving organizational environments and cultural contexts. Students' research, practice, and project-based work provide critical training in project management, leadership development, and driving social change. Each student's comprehensive, customized personal learning plan features a multitude of opportunities to hone these competencies while developing high-value, field-specific knowledge and skills related to his or her area of interest, culminating in a capstone project and presentation.
